
Zoom on permalinks : an Orpheus 4.4 new feature

Share, send and manage your slideshow in complete safety.

-

The sharing link :

Orpheus allows you to send to external users and third-party, **multimedia content** through a **sharing link**.

A connection to Orpheus **is not required** to reach the **information shared**. This **content** is accessible according to the rights of the person who **performs the sharing**.

Besides, the landing page hosting the media shared is **customizable**.

-

Permalinks :

Possibility to “share” **slideshow** through links, which means **spreading** links to people who **have an access** to Orpheus.

These links are **available** even if the associated **context has disappeared**.

For a document or a selection, this function is enable on **three windows** of the Front Office : the mosaic, the zoom, and the light box.

-

The right to manage links :

The ability to generate sharing links is **defined** by a given **group**. If a user does not belong to **the** and “embedded” **do not appear**.

-

Réseaux sociaux :

Post a picture on Facebook, Twitter,
Google +
and **Pinterest** from **your Orphea website**.
